

CSC207 project specification

Music Player

Specification:

- Upon logging in, users will be able to choose between seeing locally stored songs sorted by album, genre, artist, or simply see all songs at once
- Users can designate songs as favourite songs and will also be given the option to view only their favourite songs
- Users can create playlists
- Users can view a list of all songs they've listened to previously (in the current session)
- When listening to songs anywhere, users can shuffle and / or repeat the songs they're listening to
- Playlists and favourited songs will be unique to each user
